

Homeopathic help to stop smoking

Didier GRANDGEORGE, MD, FREJUS, may 2016

We all know that we live in a polluted world and the level of carbon dioxide in the atmosphere has never been higher. Indeed the man pulled out the fossil soil carbon, the first coal then oil, and poured it in the air we breathe.

It is therefore unreasonable to continue smoking. Excepted if we agree to shorten our earthly life on earth. Smoking causes clogging of arteries, harmful for future pregnancies (the child will suffer from intra uterine growth retardation) .It has effects on the heart, lungs (respiratory failure) and especially the considerable increase risk of cancer (lung, larynx, bladder ...)

But how to quit when it became an addiction ??? Assistance is needed .Of all the proposed methods, homeopathy is simple, fast, effective and inexpensive. Here is a protocol that has proven often to be effective.

TAKE ONE DOSE OF CARBO VEGETALIS 30CH :

This is the charcoal, so this is what we inhale every puff. The idea of this remedy is that we need help to take the step. Anyhow, the first step to take in life is the birth. One leaves the mummy's belly. The umbilical cord is cut, and flow oxygen no longer happens .Due to cellular combustion, carbon monoxide invaded our cell and endangers the body.

The respiratory centers of the brain then trigger the breath and the oxygen returns: happiness and relief of having escaped of death. So we observe the following sequence: carbon monoxide - respiration-pleasure. This is the sequence of smoking. It repeats every time the smoker takes a puff. Then, each time it is a step to cross, we will be tempted to revive this sequence, for example short step from adolescence to adulthood or the last cigarette of the condemned man before passing away - to cross the third step in the afterlife!

THEN DECREASE CIGARETTE CONSUMPTION EVERY DAY BY 1 CIGARETTE PER DAY:

For example: someone who smokes a pack a day will throw a cigarette in the trash on the first day and smoke the rest of the pack. The second day he will throw two cigarettes in the trash and smoke the rest of the pack ... And so on, until the twentieth day when he throws the whole package in the garbage bin .The trash can is an important symbol: we lose things but who loses wins. This refers to the role of the father: he helps to lose the symbiotic relationship with the mother and thus, gain independence.
